## ORDER/DELIVERY STATUS

Status Active

## SPECIFICATIONS

Series	Accessories
Range	Internal accessories
Number of poles	3P / 4P
Frame type	K frame (800A/1250 A/1600A)
Type of Accessory	Shunt Releases
Accessory Detail	Release 220-240V
Standard packing	1

## DIMENSIONS

Weight 0.4 kg

## CLASSIFICATION

ETIM 5.0 EC001023

## ADDITIONAL RESOURCES

FK-Shunt Release 220/240VAC 220/250VDC

## DESCRIPTION

### Releases

The shunt releases can be fitted easily and quickly in a specifically designed accessory compartment which is accessible by removing the breaker lid. This fully insulated compartment has several pouches one of which is reserved for a shunt release indicated by a symbol printed in the breaker case and on the auxiliary device itself. External wiring can be brought into the accessory compartment through - specifically designed and positioned - break out openings in the breaker lid, or can go through channels in the breaker rear. Once this is done the wiring can be stripped and easily connected to the box terminals on the internal accessories. These terminals are designed to connect wiring up to 2,5mm<sup>2</sup>. The devices are designed to trip the breaker when its contacts are closed and the handle indicates the "ON" position. When the breaker contacts are open and the breaker handle indicates "OFF" or "TRIP" activating the releases will have no effect.
