

FDV - Nettanalytator MT962 RS485

EFA-varenr.: **801000001**

El-nummer:

Leverandørens varenr. **665192**

Type betegnelse: **MT962COM**

GTIN-nr.: **5413656651925**

Leverandør: **Industrial C&S Hungary Kft**

Sertifikat:

Etim-klasse:

Tolltariff: **9030320000**

Salgsenhet: **Stk**

Blokk nr.: **630401**

Beskrivelse

Nettanalytator
96x96
230Vac

Teknisk beskrivelse

Basic three-phase analyser - Series MT96.

Description:

Three-phase power analyzer for panel mounting with a 96 x 96 mm front fascia with compact depth.

Applications:

- Control switchboards for low and medium voltage applications.
- Allows the measurement of electrical variables utilized for the effective control of systems.
- Consumed energy can be set to trigger pulses.
- Alarm controls: full programming capability for each output, i.e., the maximum value, minimum value, and delay.

Features:

- Class 0.5 energy precision.
- Current measure .../5
- Optional RS485 Modbus /RTU communications.
- Instantaneous display of important electrical parameters.
- Digital outputs with opto-isolated transistor.
- Optional ITF technology: galvanic insulation for inputs.
- THD available per phase for power factor, voltage and current.
